Identification

fxch
M. C. Turnquist

(Note that the following is an Abstract, which should be replaced by a full description at a later time.)

Function of Entry:

To convert a slot number to a character string and append a ">" to it so it may be used as an entry name.

Calling Sequence for Entry:

used as a function

```
char7 = fxch (num_in);
```

Declaration of Arguments:

```
dcl fxch ext entry returns (char(7));  
dcl char7 char(7),  
    num_in fixed bin(17);
```

Description of Arguments:

num_in is the slot number
a 7-character character string is returned.
